Ohio Experts Will Visit the Wells To-day.

The strike in the Alamo tunnel near Biugham is reported to assay as high as 52 per cent. in lead, 45 ounces in sliver and \$3.10 in gold. both continents.

WHAT GAS WILL DO.

The town of Wellsburg, on the Ohio river, a few years ago had a population of 500. Gas was struck and manufacturies of iron, glass and pottery (all of which can be worked here) were started, another railroad was built, and now the population has reached nearly twenty thousand. This is only one of hundreds that could be mentioned.

THE COST

of putting down a well is estimated by conservative calculation at \$1,500, to the depth of 1,000 feet, within which distance satisfactory experiments near this city could certainly be made.

As TO FUEL,

with this character of a supply, Sait Lake would surpass any of the great cities of the west, and the only question to consider is the expense of hauling raw material to this point, but as everything is within Usah's borders, this can never be a draw-back, and even as to that matter gas men need not worry about their consumption, as there are already fully 40,000 consumers in Sait Lake and Ogden ready to substitute it for coal, and these are only a starter.

"Judge S— had been sick only about two weeks, and it was not until the last three or four days that the malady took a serious turn. At the beginning of his illness his suffered from diabetes and stomach disorder. Later the kidneys refused to perform their functions and he passed quietly away. Thus ended the life of one of the most promitent men in California." Like thousands of others his untimely death was the result of neglecting early sympioms of kidney disease.
